STOPit New Release: The Most Flexible Experience Yet!

It's almost here! The STOPit Spring '18 release includes a series of updates that allow for further customization of the application.

Do you want to ask users for more information when they submit a report? No problem! Questions can be added, made optional or required, and edited to meet your specific needs.

Completely configurable!

Other enhancements include: Resource Links for Administrators, Mobile DOCUMENTit enhancements, and an

updated and web reporting experience – link from your website for even more capabilities.

STOPit IMS Boosts Safety:

- 24/7 Coverage
- Bilingual Operators
- Law Enforcement Coordination
- Emergency Response Procedures

STOPit now offers an optional Incident Monitoring Service as a valuable add-on to the core platform.

STOPit IMS employs a team of trained professionals who will monitor all incoming incidents submitted to your organization and route them as needed.

STOPit IMS has been designed for accounts who prefer to have reports initially monitored by a third party and only have their team involved when necessary.

Emergency reports will automatically be sent to Law Enforcement and your organization's emergency contact, erroneous reports will be archived, and all other tips will be marked for review by the customer.

"Our operators follow a robust process to review all incoming incidents and delegate them appropriately", said Neil Hooper, CRO of STOPit.

Customers agree. "With STOPit IMS, if Law

Enforcement needs to be involved we know that the STOPit team will help make it happen 24 hours a day, 7 days a week" said Cheryl Dyer, Superintendent of Wall Township Public Schools.

Please contact your STOPit representative for more information & pricing on STOPit IMS.

STOPit Goes Global and adds New Supporter

STOPit is truly honored to add global superstar Hideki Matsui as a Japanese brand ambassador. Hideki loves what STOPit stands for and what we do for children all over the world.

We had a great series of meetings in both New York and Tokyo and are now strong partners. We can truly say that it is an honor to be associated with Hideki and his

positive message. Click the link below to watch his video message:

STOPit in the News Featured in over 20 Articles in the last Month!

We are so pleased to be able to share great news across our installed base!

Please visit the [Press Page](#) of our web site.

It's been a busy year so far in 2018 with companies, colleges and schools launching all over the nation. It is our honor to have our customers announce their successful programs in a host of states including New

Jersey, Tennessee, Texas, California, Ohio, Wisconsin, and North Dakota.

We are so proud to be providing safety and having our platform be used to avoid planned security threats, capture criminals, and help investigate concerns. We even had at least 2 school safety threat reported on

STOPit that were immediately addressed.

Featured Article – NJ.com

SOMERVILLE, NJ – Want to help fight crime? If you live in Somerset County there is an app for that.

Last month's Somerset County Fugitive of the Week Justin Tomlinson, age 29, of Manville was arrested thanks to the STOPit app, according to a joint news release from the Somerset County Prosecutor's office and Manville Borough Police Chief Mark Peltack

"On Friday, January 5, 2018 at approximately 1:00 a.m. an anonymous report, via the STOPit app, was received by the Somerset County Communications Center regarding defendant Tomlinson's location," Somerset County Prosecutor Michael H. Robertson said in a news release. "Based on the information received, Somerset County Communications notified

Manville Police Department and directed them to Tomlinson's location where he was subsequently placed under arrest without incident."

Other featured articles showcasing successes include;

- STOPit used to report and avoid school shooting threat at San Marcos High School (Santa Barbara, CA)
- STOPit used to report theft of public funds (Hillsborough, NJ)
- STOPit featured to stop workplace harassment by SHRM as a recommended digital tool (Minneapolis, MN)

STOPit Employee Profile – New Customer Success Lead Alyssa Russo

Get to know STOPit!

In this release we announce our most recent Rookie addition to the team – Alyssa Russo.

Alyssa will run Customer Success, teamed with our Customer Service and Training lead Teresa Reuter. Alyssa joins STOPit with 12 years of experience running Customer Success and Service for another successful

technology provider. She brings a wealth of experience and expertise to us and we have already felt her impact as she assist customers and partners alike.

STOPit is the #1 provider of incident reporting and management with thousands of installations across the world. We are committed to continuing to be relentlessly focused on customer success – and Alyssa comes ready with that approach.

Get to know Alyssa – you will love her passion!

For Schools: Schedule your Cybersafe Education Assembly!

Programs are in place, but kids often need to be reminded of the dangers of the online world. A great learning tool can be a 45 minute age-specific CyberSafe Assembly – contact us to book your presentation today!

“STOPit, you are truly making a difference in the lives of students!”

Tip of the Month: Forget to do something? Set Your Alerts!

One of the most commonly asked questions we are asked is “What if I forget to do something?”

This is why we built the “Alerts” function. Alerts can be set to email DOCUMENTit users when a condition is met. The

Alert engine runs once a day and will send alerts to these users based on their profile. Example Alerts that you can set include;

-An Incident is marked as a specific Type

-Pending Incidents that are aged a specific amount of days

-A specific individual is identified as a Target/Perpetrator

Try it out, it’s really helpful!

About STOPit

STOPit is transforming the way the world prevents inappropriate behavior. Everyone from business to government to education depend upon the individuals within their community to speak up in order to keep people safe and mitigate risk. But legacy reporting systems – paper, hotlines, even web reporting – no longer

meet the needs of our modern connected society. STOPit allows you to meet people where they are and how they are willing to speak up.
